

This page documents the Monterey High School portion of the Facility Needs Assessment that came out on 1/08/2018, the same year Measure I passed. It is now called the District Facilities Master Plan. Nowhere on this list are stadium lights, a new weight room, press box, expanded playing fields, new PA system, chain link fencing, opposing bleachers, or expanded parking facilities...None of the items on the classroom needs list were selected for Measure I funding after it was passed claiming to fix these things. Think what a dent the 17 million allocated solely for sports upgrades could have made to classroom and other needs like a new Gym that all students could benefit from and replacing portables
